Supplementary Table 1. Characteristics of patients who received advanced PICU-level therapy

Age, months	Toxic agent	AdmissionGCS	AdvancedPICU-leveltherapy	Indication for CRRT/TPE	PICU length of stay, days
16	Alcohol-containing product	13	IMV,vasopressorsupport,CRRT	Severe metabolic acidosis and hemodynamic instability	16
27	Olanzapine	8	IMV, vasopressor support	-	5
30	Agricultural pesticide	13	IMV	-	4
40	Calcium channel blocker/ ACE inhibitor combination preparation	13	NIV, vasopressor support, intravenous lipid emulsion, CRRT, TPE	Severehemodynamicinstabilityand metabolic derangement	5
84	Paracetamol	15	TPE	Hepatotoxicity and coagulopathy	4

ACE:Angiotensin-convertingenzyme,CRRT:Continuousrenalreplacementtherapy,GCS:GlasgowComascale,IMV:Invasivemechanicalventilation,NIV:Non-invasiveventilation, PICU: Pediatric intensive care unit, TPE: Therapeutic plasma exchange
